

I am concerned that single ownership of newspapers, TV stations and Radio stations in a city or region will limit the scope of programing the public will be able to receive. That the particular interests of a single owner will be broadcast through this media and our already under informed public will become even more poorly informed. That we will become a nation of "rubber stamps" not a people who makes informed decisions, because we will have limited information. We need diversity in media and diversity in information as long as there are people who want to express news in a factual manner - to disseminate the TRUTH. We don't need more information presented with a bias or slant.
